

I am writing in regard to NAB's petition 04-160.  
As an American Citizen, I believe that I should have the right to choose from  
who I get information.

It has become an alarming trend in this country, that established conglomerates,  
rather than improving services to compete with newly established technologies,  
instead take a legal approach to unfairly cripple their competition.

I enjoy listening to XM radio. They offer a quality service that I willingly  
pay to receive. They are now offering traffic and weather reports, which I also  
am glad to have.

It would be another blow to American freedom and our free market if the NAB is  
allowed to dictate what I and other Americans can purchase and from who we get  
our information.

Please reject this proposal, and keep information free.

Sincerely,

Tory Deron  
Woodstock, GA USA
